

Hassan Kaabechi

Software Engineering Student , Web developer

✉ hassan.kaabechi@esprit.tn ☎ +216 50975344 📍 Gaafour , Siliana , Tunisia

in Hassan Kaabechi 🌐 Thekaa

Education

Computer Sciences Engineering , <i>ESPRIT Engineering school</i>	2021 – 2024
Instrumentation and Industrial Maintenance , <i>National Institute of Applied Sciences and Technology (INSAT)</i>	2018 – 2021
Baccalaureate Degree with High Honors , <i>Gaafour secondary school</i>	2018

Professional Experience

Top Rated Web Developer / Designer , <i>Upwork</i>	2021 – present
Web Developer (Internship) , <i>Shambix</i>	2023 Jun – 2023 Sep
Frontend Developer (Internship) , <i>TechnoGM</i>	2022

Skills

Databases

MySQL , PostgeSql , MongoDB

Backend Development

SpringBoot , Node.js , Express.js , Django

Design

Figma , Adobe xd , photoshop , Illustrator ..

Git & Github

Frontend Development

HTML , CSS , Next.js, React.js , Angular.js , Vanilla.js

Programming Languages

Javascript , Typescript , JAVA , C , Python , Dart

OS

Windows , Linux , MacOS

Cloud computing

Amazon web services

Languages

- Arabic (Native)
- English (B2)
- French (B2)
- German (A2)

Certificates

AWS Certified Cloud Practitioner

UX Design

Issued by Etikks

Python and Artificial Intelligence basics

Issued by GomyCode Tunis

Projects

Healthcare website "Sehaty"

A web application that offers comprehensive healthcare services to various contributors :

- Doctors track their patient's health and schedule online consultations.
- Patients benefit from a secure medical record system, appointment booking, medication requests, emergency ambulance services, health event notifications, and more.
- Pharmacies can list and sell medications online.
- Propose health tips and promote upcoming health-related events.

Technologies: **React , Node , Express , MongoDB , JWT , Redux , TailwindCSS**

Amazon Clone

A clone application similar to the original one with some animations and a fake product API

- User can login or create a new account .
- User can search and filter products .
- User can add products to cart or remove them .

Technologies: **HTML , CSS , React , Styled components , Node , Express , Firebase , Redux , Context API**

Coffee Masters

A VanillaJS single-page application (SPA), leveraging plain JavaScript to construct a fully functional app. I built a custom routing system, implemented web components, and achieved dynamic rendering entirely from scratch with plain javascript.

This approach allowed me to effectively craft a sort of a customized library / framework and dive deeply into JavaScript and browser APIs .

Technologies: **Vanilla JS , HTML , CSS**

KaaPrompts

A fullstack Next.js 13 CRUD application of an open source AI prompting tool for modern world that helps to discover , create and share creative prompts .

- User can login or create a new account.
- User can create , explore , save and share prompts.

Technologies: **React, Next , TailwindCSS , AWS Cognito , AWS S3**

Project Kaddem

A web application for encouraging young students to improve their professional skills in the context of IT industry trends.

Technologies: **Angular , Spring Boot , MySQL , Typescript , Bootstrap**
